Title: Pre-, Peri- and Post-Operative Soft Tissue Management

Subtitle: E-Learning Lessons

Short text:

The DVD-Video covers the following topics as E-Learning Lessons presented by the authors Otto Zuhr and Marc Hürzeler.

Pre-Operative Soft Tissue Management

- Which clinician should consider pre-operative soft tissue improvements?
- Are there different opinions about the functional versus the esthetic sites?
- How can it be achieved clinically?
- What materials could be used?

Peri-Operative Soft Tissue Management

- What is the key for success during peri-operative soft tissue management?
- How can the clinician influence the healing potential?
- What do we need to consider in the functional area and esthetic zone?

Post-Operative Soft Tissue Management

- What are the requirements for a well-functioning peri-implant mucosa?
- How can these requirements be achieved clinically?
- Implant uncoverage in the upper and lower posterior area?
- What are the requirements for the peri-implant mucosa in esthetic areas?
- How can these requirements be achieved clinically?
- What kind of technique can be used in a given clinical situation?
- Implant uncoverage in esthetic areas - A step by step procedure.
