Buch-Information

Hrsg.: Filippi, Andreas / Saccardin, Fabio / Kühl, Sebastian
Titel: Advanced Oral Surgery
Kurztext:

Following on from the recent publication of *Basic Oral Surgery* comes the perfect book for advanced practitioners who frequently perform oral surgery procedures in their practices and want to update and develop their skills. The book is also aimed at current and prospective specialists in oral and maxillofacial surgery.

Like the first volume, *Advanced Oral Surgery* is designed as an atlas rather than a textbook. In the clinical chapters, particularly, the theoretical content is outlined in short passages of text and follows a similar structure: indications, contraindications, step-by-step clinical procedures, and postoperative controls. This second volume also contains numerous illustrations in the form of series of images and videos linked via QR codes. The content and scope of the book are based on advanced training programs and the range of clinical advanced training in oral surgery provided by university departments.

Contents

History taking

Chapter 01. Complex patient profile in oral surgery

Special equipment in oral surgery

- Chapter 02. Optical magnification aids
- Chapter 03. CO₂ laser
- Chapter 04. Piezoelectric surgery
- Chapter 05. Cone beam computed tomography

Bone-preserving interventions

- Chapter 06. Alveolar stabilization
- Chapter 07. Autologous dental hard tissue
- Chapter 08. Decoronation

Tooth preserving surgery

- Chapter 09. Surgical exposure and orthodontic alignment
- Chapter 10. Apicoectomy
- Chapter 11. Tooth transplantation
- Chapter 12. Intentional replantation
- Chapter 13. Transplantation

Soft tissue surgery

- Chapter 14. Vestibuloplasty and apically repositioned flap
- Chapter 15. Autologous soft tissue grafts
- Chapter 16. Recession coverage
- Chapter 17. Salivary stone removal

Hard tissue surgery

- Chapter 18. Cystostomy and cystectomy
- Chapter 19. Removal of exostoses
- Chapter 20. Surgical revisions of the alveolar process

Temporary skeletal anchorage

- Chapter 21. Orthodontic mini-implants
- Chapter 22. Palatal implants

Evidence

- Chapter 23. Evidence-based aspects
