Buch-Information

Autoren: Mario Imburgia
Titel: (Re)smiling
Untertitel: Restyling smiles with vertical veneers
Kurztext:

In Mario Imburgia's *"(Re)smiling"*, the author uses a standardized method combining digital technology and the milling of vertical monolithic lithium disilicate veneers. The book provides precise instructions on how to proceed, from preparation to bonding, as well as information on the steps involved in manufacturing vertical veneers using a full digital workflow. It also details how vertical veneers can be used to restore complex cases of substance loss or discoloration, and how this method can be more effective than traditional techniques. *"(RE)smiling"* is a practical guide for practitioners who seek effective protocols that are simple to implement in their daily practice with predictable results.

Contents

Basic Principles

Chapter 01. Vertical veneers: streamlining
 Chapter 02. The VertiCAD approach for veneer preparation
 Chapter 03. Esthetics
 Chapter 04. An app for esthetic analysis and planning
 Chapter 05. Manufacturing ultrathin veneers
 Chapter 06. Luting

Conformative Approach

Chapter 07. Correction of malpositioning
 Chapter 08. Color correction
 Chapter 09. Diastema correction
 Chapter 10. Peg shaped teeth
 Chapter 11. Implants and veneers
 Chapter 12. Veneers and the gingival outline
 Chapter 13. The smile makeover in periodontally compromised patients
 Chapter 14. Correction of asymmetries
 Chapter 15. Veneers and orthodontics
 Chapter 16. Re-treatment

Reorganized Approach

Chapter 17. Time management and rules for full-mouth restorations
 Chapter 18. The vertical dimension of occlusion: the one-step technique
 Chapter 19. The double-veneer technique
 Chapter 20. Deep bite correction
 Chapter 21. Optimizing esthetics and function
 Chapter 22. Restoring worn dentition

Fachgebiet(e): Ästhetische Zahnheilkunde
