Buch-Information

Autoren: Mauro Merli
Titel: Implant Therapy
Untertitel: Diagnosis and Surgical Therapy: The Integrated Treatment Plan
Kurztext:

The integrated treatment plan places the individual patient at the centre of the diagnostic and therapeutic process. Therefore, the concept of an integrated treatment plan seeks to satisfy the patient's wishes and expectations, from both comprehensive and interdisciplinary perspectives, involving the application of state-of-the-art technology as well as the expertise and support of the medical and dental specialities. This text delves into the process of constructing a diagnosis and assessing the potential risk factors and then describes step-by-step some of the more recent surgical procedures for patients who are candidates for implant therapy. Each phase covered is accompanied by clear references to its scientific background in order to provide the reader with bibliographic support for further study. Most procedures are illustrated with photographs and anatomical drawings.

Contents

Chapter 01. The Integrated Treatment Plan
Chapter 02. Systemic Risk Factors
Chapter 03. Local Risk Factors
Chapter 04. Integrated Diagnosis
Chapter 05. Presurgical Preparation
Chapter 06. Postextraction Socket Implant Placement and Timing
Chapter 07. Surgical Alternatives to Bone Reconstruction Procedures
Chapter 08. Bone Defect Reconstruction: Autologous Bone and Autologous Bone Substitutes
Chapter 09. Maxillary Sinus Surgery
Chapter 10. Reconstruction of Horizontal, Vertical, and Combined Bone Defects
Chapter 11. Peri-Implant Soft Tissue Management
Chapter 12. Peri-Implant Plastic Surgery

Fachgebiet(e): Implantologie, Mund-Kiefer-Gesichtschirurgie, Parodontologie
