Book information

Authors: Hendrik Terheyden
Title: Augmentation Surgery
Subtitle: Biologic Principles | Surgical Techniques | Clinical Challenges

Short text:

Bone and soft tissue augmentation of the alveolar ridge is fairly unique in medicine, because true biologic regeneration of lost alveolar bone is achievable. With this book, the author makes a fine contribution to knowledge management and clinical judgment in this dynamic field. The book begins with the basics of jaw atrophy, biology of bone regeneration, and wound healing, as well as grafts and materials. Subsequent chapters cover standard augmentation techniques such as bone grafting and soft tissue management, fully explaining available augmentation techniques for even the most demanding surgeons. The final third of the book is dedicated to a clinical decision-making scheme for different situations, challenges in the esthetic region, posterior jaws, and fully edentulous ridges. The chapters are supplemented with step-by-step clinical cases that illustrate the respective topic in a clear and comprehensible way. The book aims to introduce general dentists to the field of bone and soft tissue augmentation. It also offers more experienced colleagues, including oral and maxillofacial surgeons, many practical tips, particularly with regard to complication management.

Contents

Part A. Biologic Basics

- Chapter 01. General Principles of Augmentation Surgery
- Chapter 02. Biologic Basis of Bone Regeneration and Wound Healing
- Chapter 03. Bone Grafts
- Chapter 04. Augmentation Surgery Materials

Part B. Operating Techniques

- Chapter 05. Patient Management and Surgery Preparation
- Chapter 06. Bone Grafting: Standards and Surgical Technique
- Chapter 07. Soft Tissue Management and Augmentation
- Chapter 08. Standard Surgical Techniques for Augmentation
- Chapter 09. Alternatives and Adjuncts to Standard Augmentation Techniques
- Chapter 10. Extraction Socket Treatment

Part C. Clinical Challenges and Decision Making

- Chapter 11. Decision Making According to Defect Stage
- Chapter 12. Decision Making in the Anterior Esthetic Region
- Chapter 13. The Posterior Regions: Free-End Situations
- Chapter 14. The Atrophic Edentulous Jaw
- Chapter 15. Reparative Surgery and Complication Management

Categories: Implantology, Oral/Maxillofacial Surgery, Oral Surgery
