Book information

Title: Care Esthetics
Subtitle: A Healthy Way to Natural Facial Rejuvenation

Short text:

The Center for Advanced Rejuvenation and Esthetics was established several years ago due to growing patient demand for minimally invasive facial esthetic and regenerative procedures performed in the safest, most effective, and most natural way possible. It's no secret that we all want to look better, to live longer and healthier lives, and to feel as young as possible for as long as possible. This book, written for patients by Care Esthetics providers, offers accurate, up-to-date information that patients can understand to inform their decisions about what they want to introduce into their own bodies. It covers existing therapies including Botox, dermal fillers, laser therapy, platelet concentrates, PDO threads, and various surgical options, favoring more natural and biocompatible regenerative strategies that utilize the body's own healing potential rather than the introduction of foreign substances or chemical fillers. Facial rejuvenation can be a valuable addition to any dental practice; let *Care Esthetics* show you how.

Contents

Chapter 01. Introduction
Chapter 02. Aging and the Healing Process
Chapter 03. Foreign Body Reactions
Chapter 04. Why the Dentist?
