## Book information

**Editor:** Jensen, Ole T.  
**Title:** The Osteoperiosteal Flap  
**Subtitle:** A Simplified Approach to Alveolar Bone Reconstruction  
**Short text:**

This elaborately illustrated and concisely written book takes a fresh look at alveolar bone reconstruction, positing that the vitality of the gingiva-alveolus-implant complex is more important than simple implant longevity. With the use of osteoperiosteal flaps, the surgeon manipulates available bone to recover what is missing in a very specific way: endosteally. This relatively closed wound approach seems to spontaneously activate the epigenetic signal within the gingivoalveolar complex, and the augmentation develops in a manner analogous to primordial growth. Soft tissue generally follows suit, and implant therapy can commence, creating a functional gingiva-alveolus-implant matrix. Once mastered, bone flaps can almost entirely eliminate the need for block grafting or guided bone regeneration. The culmination of many years of clinical research independently conducted by experts around the world, this volume presents procedures for various osteoperiosteal flaps that are not only easy to learn but result in significantly fewer complications and a more vital alveolar reconstruction. It is intended for the "wet finger" clinician—the private practitioner, who must use techniques that work consistently, minimize morbidity, and are simple and relatively quick to perform. The osteoperiosteal flap, in its various permutations, fulfills these criteria beautifully.

**Contents**

Section I. Biologic Rationale  
 Chapter 01. Biologic Basis of the Osteoperiosteal Flap  
 Chapter 02. A New Biologic Classification of Bone Augmentation

Section II. Distraction Osteogenesis Techniques  
 Chapter 03. Alveolar Distraction Osteogenesis  
 Chapter 04. Supraperiosteal Transport Distraction Osteogenesis  
 Chapter 05. Rapid Alveolar Expansion of Osteoperiosteal Flaps

Section III. Pedicled Segmental Osteotomy Techniques  
 Chapter 06. Book Bone Flap  
 Chapter 07. Island Osteoperiosteal Flap  
 Chapter 08. Internal Alveolar Split Bone Graft  
 Chapter 09. Sandwich Osteotomy Bone Graft in the Anterior Maxilla  
 Chapter 10. Sandwich Osteotomy Combined with Extraction Socket Bone Graft  
 Chapter 11. Sandwich Osteotomy Bone Graft in the Anterior Mandible  
 Chapter 12. Smile Osteotomy  
 Chapter 13. Sinus Graft Combined with Osteoperiosteal Flaps  
 Chapter 14. Maxillary Alveolar Split Horseshoe Osteotomy  
 Chapter 15. Sinus Floor Intrusion as a Vascularized Osteoperiosteal Flap

Section IV. Restorative Techniques  
 Chapter 16. Alveolar Design by Stereolithography  
 Chapter 17. Esthetically Driven Prosthetic Management of Osteoperiosteal Flaps  
 Chapter 18. Esthetically Driven Surgical and Prosthetic Management of Alveolar Distraction Osteogenesis  
 Chapter 19. Recombinant Protein Application for Bony and Periodontal Augmentation  
 Chapter 20. Dental Implant Repositioning by Osteotomy in the Esthetic Zone

Section V. Developing Technologies  
 Chapter 21. Osteoperiosteal Tissue-Engineered Injectable Bone  
 Chapter 22. De Novo Tooth Engineering to Replace Lost Teeth

**Categories:** Implantology, Periodontics
