Book information

Editor: Hargreaves, Kenneth M. / Goodis, Harold E. / Tay, Franklin R.
Title: Seltzer and Bender's Dental Pulp

Short text:

This comprehensive update of a classic text presents the latest research on the dental pulp and its interaction with other tissues, highlighting its central role in both local and systemic health. The second edition has been completely revised to incorporate new chapters featuring the most topical issues in research and clinical practice, including developments in stem cell research and pulpodentin regeneration, the effects of the aging process on the pulp, and the interdependent relationship of the pulp and restorative dental procedures. New contributors bring fresh perspective to topics such as pulpal infections, odontalgia, and the relationship between the pulp and periodontal disease. Each chapter provides an introduction to its major themes for the busy clinician or dental student as well as up-to-date, biologically based clinical recommendations for restorative and endodontic procedures. Practicing clinicians will find this information to be essential to providing accurate diagnoses and effective treatment.

Contents

Chapter 01. Development of the Pulpodentin Complex
Chapter 02. Formation and Repair of Dentin in the Adult
Chapter 03. Pulpodentin Complex
Chapter 04. Pulp as a Connective Tissue
Chapter 05. Stem Cells and the Regeneration of the Pulpodentin Complex
Chapter 06. Circulation of the Pulp
Chapter 07. Dental Innervation and Its Responses to Tooth Injury
Chapter 08. Pain Pathways and Mechanisms of the Pulpodentin Complex
Chapter 09. Pharmacologic Control of Dental Pain
Chapter 10. Pulpal Infections, Including Caries
Chapter 11. Molecular Mediators of Pulpal Inflammation
Chapter 12. Interrelationship of the Pulp and Apical Periodontitis
Chapter 13. Repair of Pulpal Injury with Dental Materials
Chapter 14. Caries, Restorative Dentistry, and the Pulp
Chapter 15. Effects of Thermal and Mechanical Challenges
Chapter 16. Interrelationship of Pulpal and Periodontal Diseases
Chapter 17. Root Resorption
Chapter 18. Aging and the Pulp
Chapter 19. Differential Diagnosis of Toothache: Odontogenic versus Nonodontogenic Pain
Chapter 20. Interrelationship of Pulp and Systemic Disease
