Book information

Authors: Paul A. Brunton
Title: Decision-Making in Operative Dentistry
Series: QuintEssentials of Dental Practice

Short text:

Operative Dentistry is a rapidly changing field of restorative dentistry. Advances in caries diagnosis and management strategies, pulp protection philosophies, tooth preparation techniques and dental materials have left practitioners somewhat unsure as to what is best practice. This book answers many of the questions frequently posed by practitioners, encourages a less interventive philosophy and is an easy-to-use resource for clinical decision-making.

Contents

- Chapter 1. Clinical Diagnosis of Dental Caries
- Chapter 2. Caries Risk Assessment and Criteria for Intervention
- Chapter 3. Preservative Operative Intervention
- Chapter 4. Material Considerations
- Chapter 5. Pulp Protection Regimes
- Chapter 6. Minimizing the Effects of Further Operative Intervention
- Chapter 7. Notes on the Aetiology and Operative Management of Non-cariou Tooth Tissue Loss
- Index

Categories: Practice Management, Restorative Dentistry
