best implant courses
in the world:**

- Taught by textbook authors and world leaders in implant dentistry
- Provides ABOI credentialing
- Specialist faculty travel directly to your office over 2 days to place your very first dental implants

**Excellence in
Implant Dentistry**

Quintessence Modern Implant Dentistry

Module 1: Introduction to Modern Implant Dentistry

This session covers safe implant placement, bone grafting, and managing patients with medical complexities, focusing on improving predictability and reducing complications for the surgical team.

Module 2: Osseointegration, Biomaterials, and PRF

This 3 day weekend of the modern implant dentistry masterclass addresses biomaterials and PRF by summarizing some of the groundbreaking research performed to date on this topic and providing case examples of these biomaterials at work.

Module 3: Pharmacology, Prosthodontic Principals and Rehab

This interactive and clinically relevant 3 day program will include step-by-step protocols to manage the dental implant/oral surgery patient. It covers in detail the pharmacological choices made by the implant dentist.

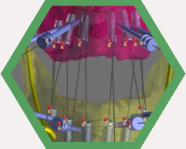

Module 4: Bone and Soft Tissue Grafting Techniques around Implants

This 3 day workshop will cover grafting techniques around both teeth and implants. It will begin with various ways to treat both soft and hard tissues, a necessity for implant dentistry.

Module 5: Sinus Lifts, Medical Emergencies, and Implants in the Aesthetic Zone

This session discusses sinus anatomy, a classification system based on the amount of residual bone, and how this system can determine what techniques are used to augment the posterior maxilla.

Module 6: Digital Workflow and Guided Surgery

Comprehensive Guided Surgery is the session to help you get started doing guided surgery on your own entirely in-house. Develop a systematic diagnostic and treatment planning approach that begins with the end result in mind.

Module 7: Abutment Selection and Prosthetic Options for Fixed Arch Restorations

This weekend covers the components of a restoration that a clinician should keep in mind. These practical guidelines are intended to simplify the process of prosthetic rehabilitation in patients requiring fixed implant-supported restorations.

Module 8: Full Arch Implant Dentistry and AAID Exam Review

This weekend will briefly touch on full arch implant dentistry but will focus massively on the AAID Exam Review that will provide all participants with an ABOI certification.

Module 9: In Office Private Trainings

One of the specialties of this implant training program is that all participants will have an opportunity to have one of our board-certified specialists that comes directly to your office and helps you place several implants over a 1-2 day period. This is the absolute best way for you to feel comfortable placing dental implants.

Module 10: Use of PRF in Facial Esthetics

Learn the biology and clinical applications behind utilizing blood derivatives and PRF formulations in facial esthetics from a combined group of leading doctors in the field
