## **Buch-Information**

Autoren: Domenico Ricucci / José F. Siqueira, Jr

Titel: Endodontology

Untertitel: An integrated biological and clinical view

**Kurztext:** 

This unique book is a serious study of clinical endodontics that underscores the biologic foundation of endodontic treatment and seeks to bridge the gap between basic endodontic knowledge and advanced endodontic biology. Written by a wellestablished clinician and a researcher with extensive background in endodontic microbiology, this book combines invaluable histologic illustrations of endodontic disease with a robust clinical text that (1) describes the pathologies affecting dental tissues as well as their reactions to the clinical procedures and (2) uses clinical microbiology to explain the observed phenomena. Treatments of complex endodontic infections are presented for both vital and nonvital pulp therapy, and the influence of periradicular pathology are addressed in detail. Moreover, the authors wade into controversial topics with detailed and comprehensive analysis, including the implications of lateral canals on treatment and the causes of treatment failures and how to avoid them. The purpose of this book is to improve endodontic treatment, and the authors demonstrate how an in-depth knowledge of endodontic infections can help clinicians to synthesize the data from patient examinations in order to visualize what has taken place, understand the processes at work, and predict what will occur with the patient. An essential clinical text for comprehensive endodontic study.

## Contents

Chapter 01. Dentin-Pulp Complex and Periradicular Tissues

Chapter 02. Pulp Response to Caries and Restorative Procedures

Chapter 03. Vital Pulp Therapy Chapter 04. Periradicular Pathology Chapter 05. Endodontic Infections

Chapter 06. Clinical Endodontics: Treatment Procedures

Chapter 07. Healing of the Periradicular Tissues Following Endodontic Treatment

Chapter 08. The Lateral Canal Issue

Chapter 09. Failure of the Endodontic Treatment Chapter 10. Endodontic-Periodontal Interrelationships

Fachgebiet(e): Endodontie
