Kessler

Titel: Fundamentals of Fixed Prosthodontics

### **Kurztext:**

The fourth edition of this popular undergraduate text has been updated and expanded to reflect new research, materials, and techniques in fixed prosthodontics, with the addition of more than 350 new illustrations and three new chapters on the restoration of implants. It is designed to serve as an introduction to restorative dentistry techniques using fixed partial dentures and cast metal, metal-ceramic, and all-ceramic restorations, providing the background knowledge needed by the novice and serving as a refresher for the practitioner or graduate student. Specific techniques and instruments are discussed, and updated information has been added to cover new cements, new impression materials and equipment, and changes in soft tissue management methods used during impression procedures. New articulators, facebows, and concepts of occlusion have been added, along with precise ways of making removable dies. Different ways of handling edentulous ridges with defects that provide better control over the functional and cosmetic outcome are also presented. Finally, the topics of esthetic and implant restorations, which have become increasingly emphasized in dental practice, are given greater attention.

### **Contents**

Chapter 01. An Introduction to Fixed Prosthodontics

Chapter 02. Fundamentals of Occlusion

Chapter 03. Articulators

Chapter 04. Interocclusal Records Chapter 05. Articulation of Casts

Chapter 06. Treatment Planning for Single-Tooth Restorations

Chapter 07. Treatment Planning for the Replacement of Missing Teeth

Chapter 08. Fixed Partial Denture and Implant Configurations

Chapter 09. Principles of Tooth Preparations

Chapter 10. Preparations for Full Coverage Crowns

Chapter 11. Preparations for Partial Coverage Crowns

Chapter 12. Preparations for Intracoronal Restorations

Chapter 13. Preparations for Severely Debilitated Teeth

Chapter 14. Preparations for Periodontally Weakened Teeth

Chapter 15. Provisional Restorations

Chapter 16. Fluid Control and Soft Tissue Management

Chapter 17. Impressions

Chapter 18. Working Casts and Dies

Chapter 19. Wax Patterns

Chapter 20. Investing and Casting

Chapter 21. Cementation and Bonding

Chapter 22. Esthetic Considerations

Chapter 23. All-Ceramic Restorations

Chapter 24. Metal-Ceramic Restorations

Chapter 25. Pontics and Edentulous Ridges

Chapter 26. Solder Joints and Other Connectors

Chapter 27. Restoration of Osseointegrated Dental Implants

Chapter 28. Single-Tooth Implant Restoration

Chapter 29. Multiple-Tooth Implant Restoration
