Book information

Editor: Chen, Stephen / Buser, Daniel / Wismeijer, Daniel

Title: Ridge Augmentation Procedures in Implant Patients

Subtitle: A Staged Approach

Series: ITI Treatment Guide Series

Short text:

Volume 7 of the ITI Treatment Guide series provides clinicians with the latest evidence-based information on the techniques and materials utilized for ridge augmentation. An up-to-date analysis of the current evidence is based in part on the proceedings of the ITI Consensus Conferences in Stuttgart (2008) and Bern (2013) and on a review of the current literature. Twelve clinical cases demonstrate the planning and treatment principles required to successfully rehabilitate patients with varying degrees of ridge atrophy.

Contents

Chapter 01. Introduction

Chapter 02. Consensus Statements on Ridge Augmentation and Review of the Literature

Chapter 03. Preoperative Assessment and Planning

Chapter 04. Methods for Ridge Augmentation

Chapter 05. Implant Placement in Augmented Sites and Treatment Outcomes

Chapter 06. Clinical Case Presentations

Chapter 07. Management of Complications

Chapter 08. Conclusions

Chapter 09. References
