## **Book information**

Authors: Vicente Jiménez-López

Title: Occlusal Adjustments in Implants and Natural Dentition: 3D

Occlusion

Subtitle: TMJ pathology related to occlusion: etiopathology and treatment

**Short text:** 

This book provides a meticulous analysis of occlusion and the many anatomical factors involved: natural teeth and implants, gingiva, tooth- and implant-borne prostheses, masticatory muscles, ligaments, the TMJs, and articular capsules and disks, among others. Furthermore, the problems that can lead to malocclusion often relate to additional patient factors, emotional stress, bruxism, clenching, and the jaw being out of proper position. The book also covers referred pain, which can mimic joint symptoms caused by neck and masticatory muscle problems, as well as headaches and facial pain that may be connected to occlusion-related muscle problems including the neck muscles. The accompanying DVD includes more than 200 clinical animations.

#### **Contents**

Chapter 01. Work Philosophy

Chapter 02. Occlusion-Related Terminology

Chapter 03. Organic Occlusion and Basic Principles

Chapter 04. Anterior Guidance

Chapter 05. Centric Relation

Chapter 06. Bilateral Posterior Occlusal Stability

Chapter 07. Vertical Dimension

Chapter 08. Etiopathology of Occlusal Problems: Prematurities and Interferences

Chapter 09. Occlusal Etiology of TMJ Pathology

Chapter 10. Splint Therapy

Chapter 11. Occlusal Adjustment

Chapter 12. Occlusion in Implant-Supported Fixed Dental Prostheses and Single Units
