Book information

Authors: Bernard C. Kolster / Uwe Paasch

Title: Illustrated Guide to Collagen Induction with Platelet-Rich Plasma (PRP)

Subtitle: Rejuvenation Face | Neck | Décolleté | Hands

Short text:

Platelet-rich plasma (PRP), already frequently used in orthopedic medicine, has become more and more popular for esthetic dermatology treatments. It is now an evidence-based practice used all over the world. This illustrated guide introduces all the relevant aspects of PRP application in esthetic dermatology. In addition to basic principles, possibilities and limitations, it also provides a practical presentation of current systems for harvesting PRP. One chapter is devoted to a series of striking photographic case histories extending over the course of several months, which demonstrate both the potential and the limitations of this method. Other tools include in-depth diagrams of various regions of the face, neck, and hands and how PRP should be applied in each area as well as patient information sheets and forms. Therefore, this book serves to equip potential practitioners with all the information they need to be able to perform PRP treatments in esthetic medicine.

Contents

Chapter 01. Skin repair and skin regeneration as a therapeutic principle

Chapter 02. PRP in aesthetic medicine

Chapter 03. PRP preparation systems

Chapter 04. Application methods

Chapter 05. Patient management

Chapter 06. Documentation and organization

Chapter 07. Treatment

Chapter 08. Regional applications

Chapter 09. Case histories

Chapter 10. Aids for the practitioner

Appendix: References, Manufacturer directory, Index
