Buch-Information

Autoren: Marjan Laekeman / Roland Kreutzer

Titel: Palpation in Vivo

Untertitel: Localizing anatomical structures precisely and palpation

Kurztext:

The ideal workbook for learning, practicing, exercising and enhancing “hand skills” in palpation anatomy. This pictorial atlas is a workbook and reference for physical therapists, physicians, osteopaths, massage therapists, and alternative practitioners – professionals who use their hands to examine and treat the musculoskeletal system. The book is about daily “handcraft” – the fast focused palpation, location, and evaluation of anatomical structures. All regions of the human body (head, torso, upper and lower extremities) are considered. All structures relevant to therapy are presented as concisely as possible and in as much detail as is necessary.

Fachgebiet(e): Physiotherapy
