Buch-Information

Autoren: Jordi Manauta / Anna Salat

Titel: Layers: An Atlas of Composite Resin Stratification

Kurztext:

Despite the many advances of contemporary dental research in biomaterials and tissue regeneration, no dental material can perfectly correspond to natural tooth. The authors of this dynamic atlas posit that it is the mastery of layering technique and not the material itself that is most important in recreating natural-looking restorations.

This reference book uses over a thousand images to explore the stratification of natural tooth and demonstrate solutions for how to arrange layers of composite resin to recreate the color, opacity, shape, and surface abnormalities of natural tooth. The authors provide step-by-step instruction in basic layering techniques as well as in advanced applications of dental characteristics, which are possible with a wide range of esthetic dental materials. In addition, each chapter is prefaced with insights from luminaries in esthetic dentistry, including *Luiz Narciso Baratieri, Galip Gürel, Pascal Magne, Francesco Mangani, Ricardo Mitrani*, and *Angelo Putignano*, among others.

Optimal stratification techniques not only create natural-looking beauty in restorations but also imitate the innate bioarchitecture of teeth, which is the foundation of functional and esthetic results.

Contents

Fachgebiet(e): Ästhetische Zahnheilkunde, Restaurative Zahnheilkunde

Auflage:	1st Edition 2012
Seiten::	448
Abbildungen:	1234
Einband:	Hardcover
ISBN:	978-88-7492-173-7
Erschienen:	Oktober 2012
