Book information

Editor: Giannobile, William / Lang, Niklaus P. / Tonetti, Maurizio S.
Title: Osteology Guidelines for Oral & Maxillofacial Regeneration
Subtitle: Clinical Research

Short text:

Important aims of clinical research include the development of study objectives, research design methodology, and outcome measures. Proper articulation of these goals will lead to the determination of the outcomes of safety, efficacy and/or effectiveness of new dental drugs, biologics, devices, or procedures to improve patient care. This book guides researchers in creating protocols that lead to meaningful outcomes in oral and maxillofacial tissue regeneration. This text is written by a group of eminent investigators with expertise in all facets of clinical research from methodology to clinical protocols. Covered topics include oral and maxillofacial imaging, histomorphometry, examiner calibration, good clinical practice, ridge augmentation, soft and hard tissue grafting, sinus augmentation, and periodontal regeneration protocols. This is an essential reference guide for clinical researchers engaged in research in oral tissue regeneration.

Contents

Part I. General Aspects in Clinical Research

Chapter 01. Research Designs and Hierarchies of Evidence
Chapter 02. Regulatory and Good Clinical Practice Aspects in Clinical Practice
Chapter 03. Ethical Aspects in Clinical Research
Chapter 04. Development of a Clinical Research Protocol
Chapter 05. Management of a Clinical Study
Chapter 06. Authorship and Publication of Clinical Research Findings

Part II. Tools for Preparation, Conduction and Analysis of a Clinical Study

Chapter 07. Endpoints in Oral and Maxillofacial Regeneration Clinical Trials
Chapter 08. Patient Reported Outcome Measures (PROMs) for Implant Dentistry and Oral Tissue Regeneration
Chapter 09. Examiner Standardization and Calibration for Oral and Periodontal Regenerative Studies
Chapter 10. Statistical Analysis for Clinical Studies
Chapter 11. Analytical Methods

Part III. Study Protocols for Specific Indications

Chapter 12. Clinical Research Protocols for Indications in Dental Regeneration
