Title: Adhesive Restoration of Endodontically Treated Teeth

Series: QuintEssentials of Dental Practice

Short text:

Dentine bonding systems, composite resins and fibre posts have widely replaced cast posts and amalgam as core materials; all-ceramic and composite crowns have also replaced metal ceramic crowns in many aesthetic cases. The aim of this book is to provide the general practitioner with some principles and techniques for the adhesive restoration of root filled teeth.

Contents

Chapter 01. The First Step: the Endodontic Treatment

Chapter 02. Adhesion and the Root-filled Tooth

Chapter 03. Crowning Root Canal Treated Teeth

Chapter 04. Fibre Posts

Chapter 05. Problem Solving in the Restoration of Teeth with Fibre Posts

Chapter 06. Understanding the Failure of Adhesive Restorations in Root Canal Treated Teeth

Chapter 07. Endodontic Retreatment of Teeth Restored with Adhesive Techniques and Fibre Posts

Chapter 08. The Restorability of Broken Down Teeth—the Decision-Making Process
