Title: Sleep Apnea
Subtitle: Treatment of Sleep-Related Breathing Disorders in Dentistry

Short text:

Sleep apnea affects millions of people worldwide, yet according to current estimates, only 5% of cases are diagnosed and treated. Treatment of sleep apnea requires interdisciplinary cooperation between sleep medicine specialists, dentists, and dental technicians. This three-part DVD provides a complete guide to treating the two main causative bite relationships associated with sleep apnea—the edge-to-edge bite and the deep bite. A mandibular advancement device will not solve the problem in every case, but it does help many patients improve their quality of life and prevent serious complications of the disease. Successful treatment of sleep apnea requires the systematic teamwork of specialists in all three specialty fields and a sound knowledge of the disease.

Contents

Part 1. Sleep Medicine Principles and Terms; Dentally Relevant Sleep Related Breathing Disorders (SRBD)
Part 2. Mandibular Advancement Devices (MAD) for Treatment of Obstructive Sleep Apnea Syndrome (OSAS): Clinical Procedures and Indications
Part 3. Mandibular Advancement Devices (MAD) for Treatment of Obstructive Sleep Apnea Syndrome (OSAS): Device Selection and Manufacture

Categories: Human Medicine, Functional Therapy, General Dentistry, Dental Technology
