## Book information

**Authors:** Mario Imburgia  
**Title:** (Re)smiling  
**Subtitle:** Restyling smiles with vertical veneers  
**Short text:**

In Mario Imburgia's *"(Re)smiling"*, the author uses a standardized method combining digital technology and the milling of vertical monolithic lithium disilicate veneers. The book provides precise instructions on how to proceed, from preparation to bonding, as well as information on the steps involved in manufacturing vertical veneers using a full digital workflow. It also details how vertical veneers can be used to restore complex cases of substance loss or discoloration, and how this method can be more effective than traditional techniques. *"(RE)smiling"* is a practical guide for practitioners who seek effective protocols that are simple to implement in their daily practice with predictable results.

### Contents

#### Basic Principles

Chapter 01. Vertical veneers: streamlining  
 Chapter 02. The VertiCAD approach for veneer preparation  
 Chapter 03. Esthetics  
 Chapter 04. An app for esthetic analysis and planning  
 Chapter 05. Manufacturing ultrathin veneers  
 Chapter 06. Luting

#### Conformative Approach

Chapter 07. Correction of malpositioning  
 Chapter 08. Color correction  
 Chapter 09. Diastema correction  
 Chapter 10. Peg shaped teeth  
 Chapter 11. Implants and veneers  
 Chapter 12. Veneers and the gingival outline  
 Chapter 13. The smile makeover in periodontally compromised patients  
 Chapter 14. Correction of asymmetries  
 Chapter 15. Veneers and orthodontics  
 Chapter 16. Re-treatment

#### Reorganized Approach

Chapter 17. Time management and rules for full-mouth restorations  
 Chapter 18. The vertical dimension of occlusion: the one-step technique  
 Chapter 19. The double-veneer technique  
 Chapter 20. Deep bite correction  
 Chapter 21. Optimizing esthetics and function  
 Chapter 22. Restoring worn dentition
