Book information

Authors: Salvatore Scolavino / Gaetano Paolone

Title: Posterior Direct Restorations

Short text:

This book achieves the ambitious aim of showing dentists how to create conservative and esthetic direct restorations of posterior teeth using composite resin. The book begins with a primer on occlusal anatomy, describing the specifics of each type of posterior tooth. This foundation supports the diagnosis and treatment of lesions, isolation, and cavity preparation for the buildup, as well as modeling, detailing, and finishing of restorations that closely mimic natural tooth anatomy for optimal esthetics and function. Numerous clinical tips and case examples are provided, and the procedural rationale is supported by scientific evidence, in addition to the authors' considerable clinical experience. Techniques for a wide range of clinical scenarios are presented to provide practitioners with the information they need to achieve optimal restorations.

Contents

- Chapter 01. Shape and Visual Perception
- Chapter 02. Anatomical Knowledge for Modeling
- Chapter 03. Diagnosis and Treatment of Early Caries Lesions
- Chapter 04. Isolation
- Chapter 05. Cavity Preparation
- Chapter 06. Restoring the Interproximal Wall
- Chapter 07. Occlusal Modeling
- Chapter 08. Detailing
- Chapter 09. Finishing, Polishing, and Finalizing the Occlusion
- Chapter 10. Clinical Cases
