

Book information

Authors: Janice Fiske / Chris Dickinson / Carole Boyle / Sobia Rafique / Mary Burke
Title: Special Care Dentistry
Series: QuintEssentials of Dental Practice

Short text:

People who have a mild or moderate disability - whether physical, sensory, intellectual, mental, medical, emotional, or social in nature - can and should receive dental care in mainstream clinics and private practices. In most cases, however, the average clinician has no training or experience in treating this population of patients. This book examines the principles governing special care dentistry and provides knowledge, information, and practical advice for the entire dental team to facilitate its delivery.

Contents
