Información sobre el libro

Autores: Marc Quirynen / Nelson R. Pinto
Título: Leukocyte- and Platelet-Rich Fibrin in Oral Regenerative Procedures
Subtítulo: Evidence-Based Clinical Guidelines
Texto breve:
 This book will guide clinicians to achieve great results with L-PRF. It starts with basic science chapters on tissue regeneration, blood centrifugation, and an explanation of the biologic power of platelet concentrates. However, the true value of this book lies in an evidence-based evaluation of the benefits of L-PRF in periodontal and maxillofacial surgery, as well as in chronic wound therapy. For each treatment, a step-by-step approach has been created by experienced clinicians. The most crucial steps are explained in 18 videos via augmented reality.

Contents

General Introduction to L-PRF: Leukocyte- and Platelet-Rich Fibrin
Part A. Basic Science and Preparation of L-PRF
 Chapter 01. Blood Composition and Cellular Characteristics
 Chapter 02. Wound Healing
 Chapter 03. Centrifugation of Blood via Specific L-PRF Protocols
 Chapter 04. General Characteristics and Mode of Action of L-PRF Membranes
 Chapter 05. Potential Role of L-PRF in Periodontal Regeneration
 Chapter 06. Preparation of Various L-PRF Constructs

Part B. Clinical Applications of L-PRF

Chapter 07. L-PRF as Substitute for Ridge Preservation
 Chapter 08. The Use of L-PRF in Sinus Therapy
 Chapter 09. The Use of L-PRF During Bone Regeneration Procedures
 Chapter 10. Implant Coating with L-PRF to Facilitate Osseointegration
 Chapter 11. L-PRF to Promote the Regeneration of Intrabony Defects Around Teeth
 Chapter 12. The Use of L-PRF for Periodontal Plastic Surgery
 Chapter 13. L-PRF in the Management of Peri-Implantitis
 Chapter 14. L-PRF for the Management of MRONJ
 Chapter 15. L-PRF Soft-Blocks for Ridge Preservation in Sockets with Major Bone Defects
 Chapter 16. Step-by-Step Protocols
 Chapter 17. L-PRF for Extraoral Wounds
 Epilogue
