Portada:	Hardcover, 21 x 28 cm
ISBN:	978-1-85097-292-1
Nº de stock:	BG119
Publicado en:	diciembre 2015

## Información sobre el libro

Autores:	Vicente Jiménez-López
Título:	Occlusal Adjustments in Implants and Natural Dentition: 3D Occlusion
Subtítulo:	TMJ pathology related to occlusion: etiopathology and treatment

### Texto breve:

This book provides a meticulous analysis of occlusion and the many anatomical factors involved: natural teeth and implants, gingiva, tooth- and implant-borne prostheses, masticatory muscles, ligaments, the TMJs, and articular capsules and disks, among others. Furthermore, the problems that can lead to malocclusion often relate to additional patient factors, emotional stress, bruxism, clenching, and the jaw being out of proper position. The book also covers referred pain, which can mimic joint symptoms caused by neck and masticatory muscle problems, as well as headaches and facial pain that may be connected to occlusion-related muscle problems including the neck muscles. The accompanying DVD includes more than 200 clinical animations.

### Contents

- Chapter 01. Work Philosophy
- Chapter 02. Occlusion-Related Terminology
- Chapter 03. Organic Occlusion and Basic Principles
- Chapter 04. Anterior Guidance
- Chapter 05. Centric Relation
- Chapter 06. Bilateral Posterior Occlusal Stability
- Chapter 07. Vertical Dimension
- Chapter 08. Etiopathology of Occlusal Problems: Prematurities and Interferences
- Chapter 09. Occlusal Etiology of TMJ Pathology
- Chapter 10. Splint Therapy
- Chapter 11. Occlusal Adjustment
- Chapter 12. Occlusion in Implant-Supported Fixed Dental Prostheses and Single Units

### Co-authors

Jaime Jiménez-García • Silvia Jiménez-García • David Jiménez-García • María José Jiménez-García

**Categorías:** Diagnóstico y terapia funcionales, Implantología
