## Información sobre el libro

**Autores:** Qi Liu / Haidong Zhang / Jingwen Yang / Xia Yan / Chao Suo

**Título:** Periodontal Surgery for Root Coverage

**Subtítulo:** A step-by-step guide

#### Texto breve:

This well-illustrated atlas focuses on advanced surgical techniques for restoring soft tissue defects around natural teeth caused by varying degrees of gingival recession. Following a discussion of the biologic basis and rationale for increasing soft tissue volume, the authors review the development and mechanisms of root coverage. They provide step-by-step instructions for the prevailing techniques of root coverage therapy for a successful pink esthetic treatment outcome. Clinical cases demonstrate the techniques, outlining evidence-based principles and clinical considerations in a clear and easy-to-follow manner. For those who want to learn to predictably treat gingival recession, this book is an excellent aid.

#### Contents

- Chapter 1. Biologic principles of periodontal tissues
- Chapter 2. Basic concepts of gingival recession and root coverage
- Chapter 3. Instruments for root coverage surgery
- Chapter 4. Presurgical preparation and postsurgical maintenance
- Chapter 5. Free gingival graft and subepithelial connective tissue graft
- Chapter 6. Coronally advanced flaps with subepithelial connective tissue graft: a classic protocol for root coverage
- Chapter 7. Tunnel technique with subepithelial connective tissue graft for root coverage
- Chapter 8. Two-stage technique

**Categorías:** Cirugía oral y maxilofacial, Cirugía oral, Periodoncia, Odontología en general
