Información sobre el libro

Autores: Geoffrey Bateman / Shuva Saha / Iain L. C. Chapple

Título: Contemporary Periodontal Surgery

Subtítulo: An Illustrated Guide to the Art behind the Science

Serie: QuintEssentials of Dental Practice

Texto breve:

This book aims to provide an evidence-based and highly illustrative approach to a comprehensive repertoire of surgical procedures, including: basic principles, resective surgery, regenerative techniques and periodontal/peri-implant plastic surgery. It emphasizes the importance of case selection and planning to successful outcomes and extols the benefits of microsurgical instrumentation. The distinction between periodontal and other forms of oral surgery is made, principally that in periodontal surgery, the contour and quality of the tissues post-operatively is vital to longer-term success and therefore careful soft tissue management is pivotal.
